

MONTEREY

AT THE LAS VEGAS COUNTRY CLUB

Identification of your Units Air Conditioner

The outside air conditioner of your Unit needs a label to specifically identify it to your condominium Unit number (e.g., 3401). This can be accomplished by using, as an example, a black “Super Sharpie Marker – permanent marker”, to put your Unit number on the metal box or boxes attached to your building, that have a metal conduit to your air conditioner. If you are unsure of which air conditioner belongs to your unit, turn on your air conditioner and note that the fan will be running, or contact the Monterey Homeowners Association Office (HOA) at 702-735-3143. All homeowners are responsible for the identification labelling of their Units air conditioner. If there is already a legible label, with your Unit number, on the metal box or boxes, then there is nothing else that needs to be done.
